Playhouse with splash table

Lin is one of seven different playhouses in the LEDON Explore series. In addition to two benches and a table, Lin also has a splash table, which can be used by several children at the same time. Playing with sand and water stimulates the sense of touch, fine motor skills and creativity. Fine motor skills are important for hand development and grip patterns, which in turn are important for learning to write. The playhouse's floors are designed with a specially developed non-slip cubit-grain surface, and so the playhouse does not require a safety surface, and can therefore stand on grass.

The entire LEDON Explore series has been **designed in cooperation with children** to ensure the highest possible play value. Moreover, none of the playground equipment requires special maintenance, while the natural colours ensure a realistic playground. The entire Explore series is designed and manufactured at our production facilities in Denmark.

Why choose LEDON Explore?

- Low-maintenance play equipment in natural colours.
- In particular, it challenges and stimulates children's social skills, motor skills and balance.
- The play systems come in a wide range of sizes and price classes to suit every need.
- A theme world that arouses children's natural interest in experiencing and exploring the world.
- The largest theme world with many different items of play equipment for the entire playground.
