## Atox is a multi-functional play environment

Atox is a popular single tower model in the Explore universe because it spans a wide age group. The non-slip steps make it possible for even two-year-olds to climb up into the tower and have a go on the fun slide. The tower also provides access to the crow's nest, where the moveable telescope encourages role-playing even over large distances.

## A kitchen sets the scene for role-playing

Atox has a floor height of 90 cm. The play system is designed with a roof, which gives children a sense of being in a hut and a playhouse. The roof protects them from the wind and weather, and shades them from the sun. At ground level is the kitchen, which is ideal for role-playing with imaginary pots and pans. What shall we bake? And when shall we eat?

## Why choose LEDON Explore?

- Low-maintenance play equipment in natural colours.
- In particular, it challenges and stimulates children's social skills, motor skills and balance.
- The play systems come in a wide range of sizes and price classes to suit every need.
- A theme world that arouses children's natural interest in experiencing and exploring the world.
- The largest theme world with many different items of play equipment for the entire playground.
